- Easy YouTube video embedding
- Display RSS feeds from other websites
- Offer visitors downloadable files, e.g. videos
- Social media integration – add Facebook, Twitter, LinkedIn, Google+, YouTube and other buttons
- 'Users online' and visitor counter

Getting started

Simply choose one of our Web Hosting packages and complete the checkout process. After you log in to your control panel, choose 'Web Builder' from the available icons to build your website. From here you can access everything you need to build your website. Email accounts are included as standard with all our hosting packages.

Frequently asked questions

Do I need a domain name and web hosting with you to use the Website Builder?

Yes, you'll need to purchase a web hosting package from us if you don't already have one. You also need a domain name; we recommend registering or transferring your domain to us where possible for a seamless experience.

Take a look at our Web Hosting and Domain Names pages for more details.

How do I access the Website Builder?

Once you've purchased a hosting package, log in to your control panel and go to 'Web Builder'. From here you can access everything you need to build your website.

Can I back up my website?

You can download backups of your website whenever you like straight from your control panel.

Do I need to know how to code to use the Website Builder?

Not at all; everything is drag-and-drop or easily editable in a few clicks. If you're comfortable with HTML, CSS, and/or JavaScript, you can edit and add code as you wish - but that's completely optional.

What kind of support is included?

The Web Builder includes a comprehensive Help Centre with videos, tutorials, and on-screen guides. It's intuitive and easy to use, but if you have a specific question or need further help, please contact our UK support team via your control panel.

Start building your perfect website with our Website Builder!
